Junior Software Quality Assurance Tester

TECHNICAL SKILLS

- Testing & QA: Manual, Automated, E2E, API, Unit, Functional, Regression, Test Case Design, Jira
- Tools: Postman, Selenium, Git, GitHub, CI/CD, Notion, Google Sheets, Excel, Jira, Confluence
- Programming & Databases: JavaScript (MERN), Java, C#, Oracle SQL, MongoDB, Python, HTML, CSS
- Others: Agile, Scrum, Kanban

EDUCATION

CENTENNIAL COLLEGE   April 2025 – December 2025
Software Engineering Technician

- **Relevant Courses:** Software Testing & Quality Assurance, Web Application Development, Software Systems Design, Advanced Database Concepts (Oracle, NoSQL), Unix/Linux OS, Programming in Java & C Sharp, Discrete Mathematics, and Software Systems Fundamentals
- **Achievements:** Cumulative GPA: 4.34, 1st Place in a Hackathon (UI/UX Accessibility).

KOREA NATIONAL UNIVERSITY OF EDUCATION   March 2017 – 2021 February
B.A. in English Education

- Developed Strong documentation and communication skills from 3+ years of teaching experience.
- Discovered QA testing through educational content quality control at University EdTech research lab.

PROJECT EXPERIENCE

Airline Ticketing Java Application   September 2025 – Present
QA Tester, QA Workshop Host

- Conducted unit testing (UT) testing and E2E testing using JUnit.
- Produced test and bug reports with coverage metrics, visualized requirement traceability matrix (RTM), defect analysis, and product improvement roadmap.
- Planning to host a QA workshop for peers, sharing hands-on test design techniques and practical testing insights from the project

UniStyle, E-commerce Web Application   September 2025 – Present
QA & Team Lead

- Managed an Agile development team with Jira, Confluence, MS Teams, and Google Sheets.
- Planned daily stand-ups and scrums for sprints with detailed workshop reports.
- Designed user-acceptance test scenarios for client-facing features.

PokeMania, MERN Stack Web Platform   May 2025 – November 2025
QA & Team Lead, Full-Stack Developer

- Performed API, regression, and manual testing using Postman, achieving full coverage of all key business requirements.
- Produced around 50 test cases and quality analysis report to support future regression.
- Designed application architecture and database schema using React, Node.js, Express, and MongoDB.
- Collaborated with developers in Agile workshops to align QA standards and enhance sprint efficiency.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- ISTQB Certified Tester Foundation Level Agile Tester   October 2025
- ISTQB Certified Tester Foundation Level   September 2025
- 1st Place, Centennial WILWORK Hackathon   November 2024
- Active member of the Centennial Engineering Club (IEEE) and LinkedIn QA communities
- Writing QA reflections and learning insights on Notion Blog
